Liberty VI has announced that its True Fiber Internet is now reaching a wider array of communities across the U.S. Virgin Islands, accompanied by the rollout of two new promotional offers. Residents who sign up for the service will enjoy a free first month and complimentary installation, the company confirmed.

The announcement is part of Liberty VI's expanding footprint in the territory and its ongoing investment in high-speed connectivity through its end-to-end fiber optic infrastructure. True Fiber Internet delivers symmetrical download and upload speeds starting at 250 Mbps and scaling up to 1 Gbps, catering to users with high demands for seamless 4K streaming, video conferencing, gaming, and multi-device use.

“With these two new offers we are presenting, I am sure that consumers will see the quality, reliability and value we are providing with our True Fiber internet,” said Ravindra Maywahlall, general manager of Liberty VI. “As we progress in our fiber internet build out, we are coming live in more communities throughout the USVI. This is also bringing us closer to our goal of improving the internet experience in the territory and extending our fiber internet to pass 100% of homes and businesses”.

Liberty VI's True Fiber network is built with low latency, offering uninterrupted performance even during peak usage hours. This next-generation system is designed to be future-proof, capable of supporting smart homes and businesses where multiple devices are connected simultaneously. The company also points to improved online security as a key feature, attributing it to the system's all-fiber architecture.

Additionally, customers who combine Liberty's postpaid mobile services with home internet service will receive double the internet speed for their household, alongside further savings once the free introductory month has ended.

For those interested in taking advantage of these new offers, Liberty VI encourages customers to call (340) 719-2943 or visit [www.libertyvi.com/fiber](http://www.libertyvi.com/fiber) to sign up or learn more.

Liberty VI operates as a subsidiary of Liberty Latin America, a major telecommunications player with operations in over 20 countries throughout Latin America and the Caribbean. Headquartered in Denver, Colorado, Liberty Latin America provides services under various regional brands including BTC, Flow, Liberty, and Más Móvil. Its offerings span residential mobile, broadband internet, digital video, enterprise-grade data solutions, and a fiber optic cable network that connects over 30 markets in the region.

In the U.S. Virgin Islands, Liberty's services currently include 5G mobile coverage for 95 percent of the population, fixed wireless internet, and ongoing development of a full-scale fiber network.
