

The survey seeks to investigate the current and future skill needs of enterprises, sectors and occupations. Information is being collected from employers about their hiring needs and potential skill gaps in the labor force. Employers are also asked to report on new or emerging jobs and preparedness of the workforce for these jobs, and document issues which pose a barrier or impediment to their business. The results of the survey will be used to develop skills supply and demand forecast and help develop workforce policies and programs.

Only businesses or establishments that have been selected randomly in this scientific survey will receive a questionnaire. The BER seeks your cooperation in completing the survey questionnaire. The Business Survey is being conducted on-line but hard copies of the survey questionnaire are also available for selected businesses. For further information, please contact the Bureau of Economic Research at (340)774-9793 or email us at webmaster@usviber.org
