The Department of Planning and Natural Resources on Friday made known that while most of the territory's beaches passed the safety test this weekend, three of them failed -- all of which were in the St. Thomas-St. John district.

According to D.P.N.R., Lindbergh Bay in St. Thomas, and Frank Bay and Cruz Bay in St. John were deemed unsafe because they exceeded the established enterococci bacteria threshold considered as safe.

All other beaches, however, were good to go.

On St. Croix, they are: Stoney Ground, Protestant Cay, Buccaneer, Cramer Park, New Fort (Ft. Louise Augusta), Dorsch, Frederiksted Public Beach, Pelican Cove (Comorant), Shoy's, Rainbow, Cane Bay, Chenay Bay, Princess (Condo Row), A – Mill Harbour, Halfpenny, Princess (Condo Row) and B – Breezes Grapetree Bay.

On St. Thomas, they include: Lindquist, Coki Point, Vessup Bay, Brewer's Bay, Bluebeards, Secret Harbor, Bolongo Bay, Sapphire, Water Bay, Frenchman's Bay, Hull Bay and Magen's Bay.

And on St. John, the safe beaches are: Oppenhiemer, Johnson Bay and Great Cruz Bay.

High levels of enterococci bacteria and turbidity may be caused by runoff due to heavy rains, heavy marine vessel traffic, high wave activity near the shoreline, irresponsible recreational use, etc. Runoff can consist of sediment, pesticides, animal feces and oil & grease, all of which are harmful to the waters of the territory, says DPNR.

The department, led by Commissioner Dawn L. Henry, says it will continue to monitor these popular swimming areas. DPNR also recommends that residents use their discretion when swimming or fishing at the designated beaches. If the waters appear muddy or murky or have foul odors, do not swim or fish.

For additional information regarding water quality, call the Division of Environmental Protection at 773-1082 in St. Croix.
