About 500 customers on a portion of Feeder 10B will experience a service interruption for about 30 minutes on Saturday while a line department crew relocates primary electrical lines and other hardware from rotted poles to newly planted poles in the Frenchman's Bay area, announced WAPA.

Thirty minutes after the service interruption begins, the number of affected customers will be reduced to five. The five customers will experience a service interruption for the duration of the work. The work is scheduled to begin at 6:00 a.m. and last for about five hours.
