Imagine driving 55 miles per hour on the Melvin Evans Highway and suddenly coming across this gaping pothole. Imagine this occurs at night. You would have no time to dodge it. Many tires have grown eggs because of this hole. And it's also very dangerous and could lead to a bad — even deadly — accident. The highway is also poorly lit. So how about it Department of Public Works? Can we get this fixed? Thanks in advance on behalf of all St. Croix motorists.
